PROFESSIONAL SUMMARY

Product Manager and startup co-founder with 4+ years of experience building and shipping SaaS, AI, and consumer-facing products from 0→1. Built products used by 100+ schools, 60K+ students and 4K+ teachers, with hands-on experience across product discovery, activation, engagement, retention, analytics and experimentation.

Strong technical product background with experience working closely with engineering on APIs, integrations, workflows and data flows, while also independently prototyping and shipping products using React, JavaScript, Node.js, Vite, Git and AI-assisted development. Comfortable turning ambiguous user problems into measurable product improvements and shipped experiences.

EXPERIENCE

KAKSHA.LIVE

Co-Founder & Product Manager | Apr 2022 – Present

- Owned the end-to-end product lifecycle across ERP, LMS and AI products, from customer discovery and MVP definition to launch, adoption and iteration, scaling products to 100+ schools, 60K+ students and 4K+ teachers.
- Drove Kaksha AI product development using Mixpanel, PostHog and Google Analytics to analyze funnels, engagement, feature adoption and retention, while translating user behavior and feedback into product improvements.
- Partnered closely with engineering on APIs, workflows, data flows and integrations across payments, RFID, biometric, GPS, WhatsApp and SMS, while independently prototyping products using Cursor AI and hands-on development.

DIGITALEON
