PROFESSIONAL SUMMARY

Product Manager & Co-Founder who built Kaksha.Live from the ground up, owning product, business and operational execution over 4+ years. Scaled education platforms to 100+ schools, 60K+ students and 4K+ teachers. Combines AI product development and school workflow design with funding efforts, sales, customer onboarding and delivery management.

EXPERIENCE

Kaksha.Live

Product Manager & Co-Founder | Apr 2022 - Present

- Built Kaksha.Live from 0 to 1, owning product, business operations, customer discovery, school onboarding, sales, delivery and growth.
- Led product strategy and execution across ERP, LMS and Kaksha AI, translating real school workflows into scalable digital systems.
- Scaled the platform to 100+ schools, 60K+ students and 4K+ teachers across India.
- Owned the end-to-end product lifecycle, including user research, requirements, PRDs, prioritisation, roadmap planning, launch, adoption, analytics and iteration.
- Worked closely with my technical co-founder and engineering team on APIs, integrations, data flows, payments, attendance, RFID, biometric, GPS, WhatsApp and SMS workflows.
- Led customer onboarding and implementation, working directly with school owners, administrators, teachers and staff.
- Managed product alongside business operations, including sales, client relationships, internal processes, team coordination, delivery and customer support.
- Worked on fundraising, investor communication, accelerator programs, product demos, partnerships and growth strategy.
- Led the development of Kaksha AI, an AI-powered learning product that converts student questions into step-by-step video explanations.
- Built Opero BMS to solve operational workflows across CRM, HR, finance, attendance, communication and workflow management.

SELECTED PRODUCTS
